338458987	1	MMSI Registration	\$0.00	<b>\$0.00</b>
<b>Item Total</b>				<b>\$0.00</b>

**Vessel Owner:**

**MICHAEL DUNNE**

2261 Market Street, 289A,  
San Francisco, CA, 94114

**To be programmed Into:**

FIXED MOUNT VHF

**Vessel Name (if applicable):**

Intervention

**Registration# (if applicable):**

CA

**Documentation# (if applicable):**

CF 2991 KV

**Please Note:**

- All radios and other MMSI-requiring equipment (such as AIS units) permanently associated with the vessel should use the same MMSI.
- **This MMSI registration must be cancelled upon sale or trade of the vessel making it available to the new owner for transfer.**
- Periodically login at [www.boatus.com/mmsi](http://www.boatus.com/mmsi) to verify and update your MMSI information as necessary. Information will *NOT* change automatically when BoatUS Membership data is updated.

**Testing the DSC Function:**

Do not test the red button as this will send out an illegal false alarm and cause an unnecessary rescue response! Instead, you may run a test call to the nationwide Coast Guard MMSI number, 003669999. Enter this number into your radio's calling memory and select the "Test Call" option from the radio's list of individual DSC calls. You can then press the "call" or "enter" key. Your radio will silently hail the Coast Guard with a digital signal on channel 70. If everything is working properly, your radio will almost immediately receive the Coast Guard's acknowledgement of your call, providing assurance that both your radio and the Rescue21 system are operating properly. You must be boating in an area served by Rescue21 to use this test.

**Programming and Record Keeping:**

- For assistance with programming, refer to the radio owner's manual for specific instruction or contact the manufacturer or a qualified technician for further assistance.
- Be sure to print and include a copy of this document with your other ships documents.

**Helpful information**

- To learn more about MMSI, DSC capable VHF radios or the Global Maritime Distress and Safety System be sure to read the About section.
- To learn more about how the DSC system works refer to the online tutorial: [www.boatus.com/foundation/dsc/player.html](http://www.boatus.com/foundation/dsc/player.html)

**Thank you for registering for MMSI through BoatUS  
5323 Port Royal Road, Springfield, VA 22151**
